ES Open HF Championship 2010

Sascha, DD1IM:

Hi, dr ES-OPs, already during the contest I got problems with my log-PC... lost some stns, some system-stuckings/blackouts. A couple of hours later the PC had a total breakdown whereat I lost my log... so there's nothing to send.

However: I appreciate all the contacts with you es hpe cuagn sn. Best wishes, gl es cwfe de Sascha DD1IM

Rig: FT-1000 MP Mark V , ca. 190 W, Ant: HF9V + W3DZZ+ FD 4

I enjoyed ES Open again very much and for the first time logged with UCX-LOG of DL7UCX.. He also - after my proposal to do so - "built in" the Baltic Contest.

Wilfried, DJ6TK:

First time to visit the Contest

Heiko, DL8QS:

Thanks contest! More activity frm ES Station in CW wanted!

Bodoo, DL9FB:

TS570 100W, Windom FD4

Robert, E77E:

All rules respected, enjoyed in CW, between activity in same period working over 10 WFF stations, really nice morning for me!

Best wishes!

Juantxu, EA2WD:

I have only one QSO. Very bad propagation this day.
In the next year, well.

Thanks 73,s

Vello, ES0QD:

Yaesu FT-920; PA-GU74B; 600W
80M Delta Loop; 40M Inv "V"

Andres, ES1AN:

Sidede koguarv 295 ja kordajaid 13
Alates side jk. nr-st 86 algab järgnev tund minu side uuesti nr-ga 70.
See oli minu eksitus, et panin madalama nr-i õige oleks olnud siis 87.
See tähendab, et 17 sidet on minu poolt rohkem peetud kui sidede jrk. nr lõpus näitab.

Jõudu kontrollimisel.

Unfortunately too few answerers above 3.700 where my antenna was much more in tune than below 3.650...

Aadu, ES1TU:

Radio: ICOM IC-756 PRO 3
Amplifier: Ameritron AL-80B
Antenna: 43ft vertical

Gary, ES1WST:

Thanks for the very enjoyable contest. I started a little late due to family commitments, then didn't realize my transmitter was set for only 500mW until I had made a few QSOs. I then raised the output to 5W, which made things a lot easier. 40m was difficult for multipliers, 80m a lot better. Where was ES0?

Rig: Yaesu FT-817 (5W), Antenna: Homebrew trap vertical for 40/80m, N1MM software with homebrew CW interface.

Thanks for a contest! My apologies to people who called me, but I didn't manage to answer: S9 noise all the time... My QTH, which was almost countryside 10 years ago, is becoming more-and more „civilized“ ☹

Gedas, LY9A:

I started this nice short Contest from my Contest location, using FT-990AC, 80m Dipole and 40m Quad loop. Things were going good way until Murphy payed the visit right in the middle of the 3rd hour of the Contest. AC power went down in the middle of my 40m with ES4RX. After waiting some 20 minutes I decided to go home where FT-1000MP was waiting for me. Unfortunately, there was no other antenna exept 80 meter band Dipole. Despite of possibility to finish the Contest there was no motivation left for the serious competition. Just added few more QSO's... Anyway, thanks Estonians for the QSO's.

Jari, OH1BOI:

Rig: ICOM 756 (100W), Ant: FD4 Windom

Nice to take part. Unable to make any QSOs on 40m.
Next year will try a "serious" effort, now only a few QSOs...

Harri, OH6JYH:

Rig: FT-1000MP, Ant: G5RV

I had some starting problems, but after that contest was again fun and nice :-)
TNX. See you all in next year also.

Josef, OK1VHV:

Very strong QRM from I stations

Jean-Jacques, ON3ND:

Very interesting competition and a good opportunity to say hello to the Estonian friends.

Many thanks.

Adriaan, PA0ATG:

Rig: Yaesu FT-950 running 30 watts output; Ant: 20m end fed wire antenna.
Mni participants. More stations worked than normal.

Cu next year.

Eric, PA2REH:

Was my first time and a nice contest. Thanks all for qso. Good luck with sorting all the log entries.

Used Elecraft K2/100 with vertical.

cu all next time,

Thnx for a nice contest. I will be back next year.

Ingemar, SE5E:

I had some trouble with log in the last hour so sent wrong serial number, but the log is correct when it comes to sent numbers.

Thanks for a nice contest!

Jan-Eric, SF3A:

Rig: Icom IC-7000, 100 W; Ant: G5RV

QSO nr 36-37 - ES0QD really sent nr 194 and 196 between period 2 and 3, but I couldn't hear that he worked any other QSO in between (SO2R?).
