

ES OPEN HF CONTEST 2012 SOAPBOX

Dear Ham friends in Estonia!

Enclosed you will find my Cabrillo checklog for the ES-Open 2012 contest. I am sorry that I was able to participate only the very last hour of the contest. Next year I hope to be available to enjoy this contest on full time.

Best 73 de LA1EK, Steinar.

Tere Tonno and company!

This year I worked special for Eestipois :), because my photo is still on ES web... This year only cw, sorry... You have to calculate my score - while I used Wintest in CQ WPX mode... it was little bit difficult with dupes, but I believe my Estonian friends will make all OK with the log... I love this contest :)

73! Arvis, YL7X/YL2LY

UA3YHG:

В - Один оператор, SSB.

Спасибо за тест! Извините что мало связей, мне тяжело много не могу физически...

У меня два года связаны с Кейла-Йола поэтому не мог не поддержать!

73!!!

Selline värk. Kõik võimalikud vead võtan endale, korrespondente mitte karistada, please... Vead põhiliselt tekkinud grafiit-logi puhtaks kirjutamisel (no ei ole enam lühimälu endisel tasemel) - keegi sunnik on sinna paberile joonistanud ka mõistatuslikke hieroglüüfe, millistest mõnikord ei saa aru, et mis numbrit või tähte need peaksid kujutama...hi!

de ES1CW

My 1st ES Open, with FT857D, 100 W into a windom (80 m) and a triple leg (40 m).

I did know that the folded and „moxxonned“ windom had problems towards northeast, but I was amazed how really bad it worked. The triple leg on 40 worked a bit better, but our house was in the way. In short: weak signals, almost all pileup battles lost, many stations CQing in my face... So, as 40 m signals degraded more and more, I gave up after 2.5 hours and 45 QSOs. Anyway, thanks a lot for the nice little event, the great activity from ES, and the N1MM UDC file!

73, de Gerd, DK8NT

RADIO: FT847

ANTENNA: G5RV

Very poor conditions in this QTH, particularly in the second half. Nice contest!

Bob, G0ADH

Teo, ES1AO:

Kasutasin FT-450, 100W ja antenn oli W3DZZ 15m kõrgusel. Kehv antenn muuseas, jääb alla originaaldiipolitele (aga neid on ka kaks vaja...).

Tauri, ES5YG:

Tore võistlus oli, aga vahepeal oli suur QRM.

Aarne, ES2JL:

Hämmastavalt hea levi 40-l võrreldes eelnevate aastatega!

Tom, Tõnis, Teet, ES9C:

Good activity!

Albertas, LY5R:

It was my first ES OPEN. Fine Contest! CU next year.

Jaan, ES3RY:

Rig: IC-735. Ant: Inv.V

Seekordne ESOPEN läks üle kivide ja kändude... Pill keeldus mingil suvalisel ajahetkel töötamast, siis mingi aja pärast taastus, et mõne aja pärast jälle vaikida. N1MM tahtis teha fantastilise tulemuse... võttes kordajaks ka kõik MAAD. Aga midagi ikka sai. Lõpptulemus on käsitsi arvutatud.

Edu ja kannatust kontrollimisel!

Sergey R3LC (ex UA3LHL):

MNI TNX for the Contest!

73's!

Valdek, ES4NG:

Töö tõttu jõudsin 1,5 tundi hiljem kohale.

Peter, PA3DBS:

Thanks for organizing this contest.

Andrea, 9A3JH:

First time in this contest. Few comments: very difficult to work ES stations in pile up with QRP... Some stations don't like to listen to tiny signals. Contest timing very bad for QRP stations (also 100w), not so easy to work ES from South EU on 80m at 08,30 UTC...

TX/RX: K2 Elecraft PWR: 5 W ANT: verticals + wires ASL:270m

Vesa, OH3P:

RADIO: TS-590

ANTENNA: 80m horizontal delta loop

Thanks for nice contest, It was Fun. Hope to see U 2013!

Klaus, ES1TP/2:

Sain siis lõpuks ilusti N1MM-i kirjutatud ja Cabrillosse. Open ise kulges vägagi tempokalt, rahul et sai kaasa tehtud :) transiiveriga Icom IC-735 võimsusel 100W ja antenniks ühise toitepunktiga inverted V 80 ja 40m.

Paul, OH5UQ:

Rig: TS950 95W

Ant: BTV 5 + 40m vert. Loop

To produce results, I had to renew the ink of my printer. Then I had to change diskette station of my computer! Sorry, I don't have e-mail on a modern computer!

Gedas, LY9A:

I love this Contest! It was my 13th ES Open HF Championship and the best score so far. Great conditions on 40m helped a lot.

RIG: FT-1000MP + 80 and 40 m dipoles.

73 & CU in ES Open 2013!
